

# Are reindeer and Caribou the same?

**YES... Almost!**

Reindeer and Caribou are the same animal.

They are like cousins.

The reindeer is a little fatter.

The caribou is a little wilder.

Reindeer are like dogs that live with you,  
Caribou are like the wolves that live in  
the wild.

All caribou and reindeer have antlers.

They both like to eat lichen.

They both like to be in herds.

Have an adult share the information on this link with you read this to you
